## EXPERIENCE

### Staff Software Engineer

#### Micron Technology

📅 August 2020 – Present

📍 Austin, Texas

- Working on the Heterogeneous-Memory Storage Engine (HSE) in an effort to make it one of the fastest performing storage engines on the market
- Integrating HSE with various open source storage technologies like MongoDB, MariaDB, and Ceph
- Designing language bindings to interact with HSE

### Software Developer

#### Expero

📅 July 2019 – August 2020

📍 Austin, Texas

- Assisted in abstracting a collection of Java/TypeScript/Node.js microservices to be able to use both DataStax Enterprise and open source equivalents like JanusGraph, Cassandra, and Elasticsearch
- Developed a graph database benchmarking suite using Gatling, CosmosDB, TigerGraph, DataStax Enterprise, and Neo4j
- Migrated data from a legacy FileMaker system to AWS RDS

### Software Development Intern

#### Expero

📅 September 2017 – May 2019

📍 College Station, Texas

- Built out a graph database modeling course curriculum
- Developed a daily time reporting tool for company leads to track developer time charges using AWS Lambda and Go
- Created a microservice using AWS S3 and Java that performs dynamic PDF generation
- Built a proof of concept ASP.NET Core application using Microsoft's CosmosDB Gremlin API

### Software Engineering Intern

#### National Instruments

📅 May 2018 – August 2018

📍 Austin, Texas

- Worked as a driver developer on the XNET team, which develops solutions for automotive testing
- Implemented time synchronization between data acquisition modules in order to better correlate collected data using C++ in both the Windows kernel and userspace drivers

### Software Engineering Intern

#### Booz Allen Hamilton

📅 May 2017 – August 2017

📍 Houston, Texas

- Worked under the NASA Mission and Program Integration contract
- Translated a SharePoint table of all payloads/systems, hardware configurations, protrusions and overlaps aboard the International Space Station to MariaDB and SQL
- Developed a desktop application in Python for managing the aforementioned information

## EDUCATION

### Bachelor of Science

#### Computer Engineering

#### Texas A&M University, College Station

🎓 May 2019

## SKILLS

## PROJECTS

### Heterogeneous-Memory Storage Engine

#### GitHub://hse-project/hse

- A fast embeddable key-value store designed for SSDs and persistent memory, optimizing performance and endurance by orchestrating data placement across DRAM and multiple classes of solid-state storage

### HSE Python Bindings

#### GitHub://hse-project/hse-python

- Python language bindings for the HSE C API

### HSE Java Bindings

#### GitHub://hse-project/hse-java

- Java language bindings for the HSE C API

### Various Open Source Contributions

#### GitHub, GNOME

- My open-source contributions include organizations and technologies like Meson, GNOME, Electron, Terraform, etc.

## AWARDS/CERTS

🏆 Apache Cassandra™ 3.x Developer Associate  
DataStax – 2020

🏆 Eagle Scout Award  
Boy Scouts of America – 2014
